Data Dictionary

A Data Dictionary is a centralized repository that contains detailed information about the data elements used in a system. It defines the meaning, structure, type, and usage of each data item, helping ensure consistency and understanding across the system.

Field Name	Data Type	Size	Description	Constraints
Student_ID	Integer	10	Unique identifier for each student.	Primary Key, Not Null
Student_Name	Varchar	100	Full name of the student.	Not Null
Date_of_Birth	Date	-	Student's date of birth.	Not Null
Email	Varchar	100	Email address of the student.	Unique, Not Null
Student_Contact	Varchar	10	Contact number of the student.	Not Null
Subject_Code	Integer	10	Unique identifier for each course the student is enrolled in.	Foreign Key (references Course_ID)
Subject_Name	Varchar	100	Name of the course the student is registered for.	-
Exam_ID	Integer	10	Unique identifier for each exam.	Primary Key, Not Null
Exam_Name	Varchar	100	Name of the exam (e.g., Midterm, Final Exam).	Not Null
Exam_Date	Date	-	Scheduled date for the exam.	Not Null
Exam_Time	Time	-	Scheduled time for the exam.	Not Null

Exam_Location	Varchar	100	Location of the exam (e.g., room number, hall).	Not Null
Registration_ID	Integer	10	Unique identifier for each registration record.	Primary Key, Not Null
Registration_Date	Date	-	Date when the student registered for the exam.	Not Null
Payment_Status	Varchar	20	Status of the payment (e.g., Paid, Pending, Not Paid).	Default: Pending
Payment_Amount	Decimal	10,2	Fee amount paid for the exam registration.	Default: 0.00
Payment_Date	Date	-	Date when the payment was made.	Nullable
Attendance_Status	Varchar	20	Attendance status for the exam (e.g., Present, Absent).	Default: Absent
Admin_Name	Varchar	100	Name of the Admin	Not Null
Admin_ID	Alphanumeric	10	Unique ID of the Admin	Primary Key Not Null
Certificate_No	Integer	15	Unique number of the Result Certificate	Primary Key Not Null
Grade	Char	2	Alphabetic Representation of Result	Not Null
